

CHARACTER FLAWS & COMPLEXITIES

Characters live **public**, **personal**, **private**, and **unconscious** lives. Public is what we want people to see, Personal is what we want our family and friends to see, and Private is what only we and God can see, and the unconscious is what we don't know we don't know, but is really who we are and what we are trying to overcome.

ARCHETYPES IS THE SOFTWARE IN THE UNCONSCIOUS MIND - WE ALL THESE FOUR:

YOU "INNER" CHILD

Orphaned - a child who is abandoned by parents or God, whether physically, emotionally, mentally.

Magical Child - a genius, musical talent, psychic, has a connection to fairies or animals or some kind of magic or spiritual gift

Eternal Child - a child who refuses to grow up because they escape artists or are in denial as a coping mechanism - even a personality that hides

Parent Child - a child who grows up too fast because they have to take care of a parent, i.e. child of alcoholics/drug addicts or immature or mentally ill parent(s)

THE VICTIM - The part of ourselves that always sees itself as the victim in the story, the part of ourselves that goes to helplessness or refuses to take responsibility.

THE PROSTITUTE - The part of ourselves that sells ourself out for our physical survival. Whether it's physical, spiritual, mental or emotional.

THE SABOTEUR - The part of ourselves that gets scared when we leave our comfort zone and retrieves back to safety and comfort whether this is emotional, spiritual or physical safety and comfort.

DEATH WISHES - people have traumatic experiences and during that experience they make the wish to die. In the climax of their pain they make this

wish and they forget they did. The mind takes the command and tries to kill the person. It can show up as smoking, doing drugs, getting a motorcycle, doing dangerous behavior that can get you killed.

WOUNDS - the hurt we carry when we feel something went wrong because of our fault or failure to do something or to be perfect. Our wounds are often connected to our shame. It's a false interpretation that carries severe shame, a horrible judgement against ourselves that we use as confirmation that we are broken.

GUILT - People with unconscious or conscious guilt desire punishment and will attract an abuser. They have to forgive themselves to release the abuser/stalker/persecutor.

DISEASES - **Cancer:** deals with anger/rage connected to different traumas, **Chest problems:** unable to speak truth, uterus is connected to sexual shame/violation, rape/molestation, **Lungs:** deal with unprocessed grief, **Legs:** deal with inability or unwillingness to move forward, **Male organs:** deal with not feeling "man enough", your body registers the emotional trauma or your inability to say no and care for yourself. Check out You Can Heal Your Life to find out what each disease means and why it happens in certain parts of the body.

ANCESTRAL TRAUMA - trauma that gets transferred by each generation if it is not transformed - examples: starvation, genocide, war, refugee, persecution, torture, loss of land, etc.

Starvation - family becomes overweight generation after generation

Genocide/persecution - paranoia, mental illness, being invisible

War/Refugees - hoarding, recreation of the violence, hiding out

PERSONALITIES - when certain people experience trauma they may leave their bodies to deny it and a personality steps in. The trauma at the age that it happens gets frozen. When people drink, do drugs or are intoxicated, the personality that gets triggered can take over and that's why people sometimes can't remember what they did when they were drunk.

FAMILY CURSES - when a family member commits a sin and it is not confessed, dark forces have the right to make that family pay for it through addiction, bad luck or repetition of the crime they committed being done against them. It can show up in the first born, or only the males or females, etc. The curse could be done by professional "witch/brujo" or just a person sending their hate and ill will. The sin needs to be confessed and acknowledged by a person

in that lineage or it will continue until infinity and with each generation it gets worse.

Alcoholism & Addiction - is often the way the family copes with a family curse

Illegitimacy - children out of wedlock - cycle is repeated over and over - children feel like their souls are in jeopardy and unclaimed by God.

Suicides - as a repayment for the murder committed that was not confessed

Failed business - as repayment for sin of robbery committed by ancestor not confessed

Failed Marriages - as repayment for an ancestor impregnating a woman and not marrying her

Sexual Abuse/Incest - repeated sexual abuse as repayment for the sin of rape/molestation by an ancestor

SELF CURSES - at 5 years old something traumatic happens to us and we misinterpret our reality/situation and blame ourselves and based on the false interpretation of reality we sentence ourselves to a life where we pay for our failing for the rest of our life. We compensate for the past trying to fix the past. We remove this self curse by acknowledging we made a false interpretation of reality through our arrogance/ignorance to think that we know what is the actual truth.

ABANDONMENT BY GOD - So many people who are addicts or who have lost a loved one or experiences a horrible injustice have the belief they have been abandoned by God and use drugs, work, food, or other addictions to cushion the pain of feeling alone and helpless in the world.

YOUR PAST LIVES AND KARMA - your quirks

Some of our unconscious desires come from past lives where we enjoyed doing something that makes no sense in this lifetime. Like being a Pirate or acting like a Queen even though you live in public housing for instance. Some of our purposes and destinies make no sense sometimes, because these are things we have to do to clean up our karma. All phobias, unless the trauma happened in this lifetime, tend to come from past lives. Certain preferences for foods, cultures, languages, are often from past lives too.
